FREEZING

REFRIGERATION

WINE

No Frost
Frost Safe System
Soft Telescopic

NoFrost technology freezes frozen food with cooled re-circulated air and removes the humidity. This keeps the freezer compartment ice-free at all times, and food is no longer covered in frost. NoFrost convenience means defrosting is no longer necessary. The enclosed removable freezer drawers of the **FrostSafe system** protect the frozen food from unwanted air exchange and the loss of cold air when the door is opened. The drawers are transparent and fitted with telescopic rails to provide the perfect overview. All drawers are fitted with **SoftTelescopic**. The convenient self-closing mechanism with a gentle cushioned door closure making it practical and safe for everyday use.

Ice Maker

The automatic **IceMaker** creates 1.6 kg of filtered ice in 24 hours. The production capacity can be increased even further by activating the SuperFrost function. With a storage volume of 1.8 kg to 3.5 kg (depending on the model) there is always sufficient ice available. A replaceable water filter is located in the front section of the appliance plinth and is easily accessible.

Plenty of space in the innovative **freezer compartments** and in the door. The transparent **door racks in the freezer door** are height-adjustable, providing lots of space for smaller items. The special air ducting system in the freezer area ensures that the cold air is able to move constantly. This keeps the temperature constant, which optimises food storage.

Smart Device

The Monolith is supplied with a **SmartDeviceBox** which establishes a connection between a smartphone or tablet and the Monolith. This allows settings and functions to also be activated while you are on the move. Push messages report, for example, open doors or power failures.*

*SmartDevice functions not available in all countries.

Power Cooling

The high-performance **PowerCooling** system ensures rapid and even cooling of food in the interior and - due to the special air ducting - also of food stored in the door racks. The integrated FreshAir activated charcoal filter prevents odours from forming and cleans the incoming air.

Bio Fresh Plus

Soft Telescopic

At a temperature of slightly above 0 °C and in controllable humidity, fruit and vegetables, meat and dairy products keep fresh for considerably longer than in a conventional refrigeration compartment as a result of **BioFresh** technology. The practical **FlexSystem** helps with the sorting and clear organisation in the preferred BioFresh safe. The Monolith's third BioFresh safe goes a step further with the **Fish & Seafood safe**: Here it can reach temperatures of -2 °C, ideal for the storage of fresh fish and seafood. However, drinks can also be cooled down quickly in this safe. All BioFresh safes are fitted with **SoftTelescopic**, the convenient self-closing mechanism with gentle cushioned door closure, making it practical and safe for everyday use.

Infinity Light

Monolith's integrated LED side wall lighting casts a beautiful and even glow throughout the space. **InfinityLight** includes a soft brightening effect upon opening the doors and the lighting can be fine-tuned according to your personal taste. InfinityLight LED technology emits less heat and is more efficient than traditional lighting, preserving both your wines and the environment.

EWT 9175					
Infinity Swipe	Infinity Light	Wine	Soft System	Smart Device	Telescopic Rails
Energy efficiency class	A				
Energy consumption kWh (year / 24h)	156 / 0.427

Your wine collections deserve the best air quality. Monolith's **FreshAir activated charcoal filter** features one charcoal filter in each compartment to preserve and protect your treasured wines. Incoming air is purified while damaging odours are filtered out to prevent contamination.

Infinity Swipe

Control every function of your wine cabinet effortlessly with Monolith's intuitive electronic touch screen, **InfinitySwipe**. Featuring a full-colour 3.5 inch touch & swipe screen, that's bright and easy to read, this wonderful user-friendly feature displays up to three temperatures for multiple- zone wine cabinets.
